

Unconscious patient not breathing medium/large/xlarge dog

- Safety of self
- Response – no - shout help
- Put in lateral position preferably right side down
- Extend head/neck and pull tongue forward, Check airway - clear

- Check breathing for 10secs – no – call VET IMMEDIATELY
- 30 Chest compressions - Both hands over ribs on widest part of ribcage
Press on chest downward and sharply

- Close animal's mouth - 2 Rescue breathes into the nose to see chest rise

The key to canine CPR is remembering the ABCs:
> Airway;
> Breathing
> Cardiac compression

- Continue 30:2 until veterinary help arrives
